65147	Weather	NWR System Engineering Support	The NWR analog audio connections from the Weather Forecast Offices (WFO) to the transmitters are currently primarily leased analog telephone lines, which are becoming obsolete technology. These links will be undergoing upgrade and conversion to alternate modern day technologies. In addition, the NWR Remote Off-Air Monitoring System (ROAMS) boxes will be upgraded and replaced with a more robust monitoring and control system to provide greater situational awareness of the operational status of transmitter sites. The HazCollect Legacy, HazCollect Extended, Emergency Managers Weather Information Network (EMWIN) and International Satellite Communications System (ISCS) may also experience service enhancements, upgrades and/or consolidation and require systems engineering support during these processes.	4th Quarter FY 2021	No	No	Skjei Telecom, Inc.
